

TSAG's Site Operations & Maintenance Training

The First Nations Technical Services Advisory Group Inc. (TSAG) provides technical services and training for Alberta First Nations in the Treaty 6, Treaty 7, and Treaty 8 areas.

2-Day Course Register today!

This course has both classroom and field components and is intended for operators who are handling solid waste.

- Describe the controls needed to avoid nuisances such as vectors, odour, litter and dust.
- Identify risks in onsite traffic movement and how to control associated risks.
- Identify the issues and challenges associated with operating a transfer station.
- Select methods for optimizing transfer station operations that are most relevant to own site.
- Identify different waste stream categories and understand which streams are recyclable and/or recoverable.
- Describe waste intake procedure that reflects industry best practices.
- Demonstrate procedures for managing non-compliant waste situations.
- Communicate directions to drivers of vehicles and monitor onsite compliance.
- Identify relevant regional waste disposal locations and service providers.
- Identify the appropriate containers for different types of waste and materials and determine their storage requirements and capacity.
- Identify environmental controls and regulations that affect transfer and eco-stations.
- Describe procedures for preventing, controlling, and responding to spill or contamination incidents.
- Summarize the data collection and reporting required to confirm environmental compliance.
